The totals for each year include only publications that the scientists reported to the Division of Research Grants during the period in which bibliographic information was compiled for this Index (Oct. 1967-Sept. 1968). Earlier as well as later editions of the Research Grants Index should be consulted for additional data on publications for any given year.

# SOURCES OF PUBLICATIONS LISTED

This alphabetical list gives abbreviated titles for all sources of publications, such as journals, proceedings, books, etc., used by grantee scientists to publish findings from research projects supported by the Public Health Service, together with the total number of articles reported by the scientists for each source during the period October 1967-September 1968. Book titles are listed separately beginning on page 1773. A book or a chapter in a book was each counted as a single entry.
